the steady expansion of college enrollment rates over the last generation has been heralded as a major step toward reducing chronic economic disparities but many of the policies that broadened access to higher education including affirmative action open admissions and need based financial aid have come under attack in recent years by critics alleging that schools are admitting unqualified students who are unlikely to benefit from a college education in passing the torch paul attewell david lavin thurston domina and tania levey follow students admitted under the city university of new york s open admissions policy tracking its effects on them and their children to find out whether widening college access can accelerate social mobility across generations unlike previous research into the benefits of higher education passing the torch follows the educational achievements of three generations over thirty years the book focuses on a cohort of women who entered cuny between 1970 and 1972 when the university began accepting all graduates of new york city high schools and increasing its representation of poor and minority students the authors survey these women in order to identify how the opportunity to pursue higher education affected not only their long term educational attainments and family well being but also how it affected their children s educational achievements comparing the record of the cuny alumnae to peers nationwide the authors find that when women from underprivileged backgrounds go to college their children are more likely to succeed in school and earn college degrees themselves mothers with a college degree are more likely to expect their children to go to college to have extensive discussions with their children and to be involved in their children s schools all of these parenting behaviors appear to foster higher test scores and college enrollment rates among their children in addition college educated women are more likely to raise their children in stable two parent households and to earn higher incomes both factors have been demonstrated to increase children s educational success the evidence marshaled in this important book reaffirms the american ideal of upward mobility through education as the first study to indicate that increasing access to college among today s disadvantaged students can reduce educational gaps in the next generation passing the torch makes a powerful argument in favor of college for all

explore the five elements of an open source city using raleigh north carolina as a case study see how the open source characteristics of collaboration transparency and participation are shaping the open government and open data movements this

book showcases the open source culture government policies and economic development happening in raleigh and acts as a guide for other cities to pursue their open source city brand

academic and public libraries are much different today than they were even 15 years ago with even bigger changes on the horizon what lies in store this volume offers ideas to academic and public librarians about the future of library services editors hernon and matthews invite a raft of contributors to step back and envision the type of future library that will generate excitement and enthusiasm among users and stakeholders anyone interested in the future of libraries especially library managers will be engaged and stimulated as the contributorsexamine the current state of the library summarizing existing literature on the topic to sketch in historical backgroundproject into the future using swot analysis environmental scans and other techniques to posit how library infrastructure such as staff collections technology and facilities can adapt in the decades aheadconstruct potential scenarios that library leaders can use to forge paths for their own institutionsthe collection of knowledge and practical wisdom in this book will help academic and public libraries find ways to honor their missions while planning for the broader institutional changes already underway

this book focuses on the thorny and highly topical issue of balancing copyright in the digital age the idea for it sprang from the often heated debates among intellectual property scholars on the possibilities and the limits of copyright copyright law has been broadening its scope for decades now and as a result it often clashes with other rights frequently fundamental rights raising the question of which right prevails the papers represent the product of intensive research by experts who employ rigorous interpretative methodologies while keeping an eye on comparison and on the impacts of new technologies on law the contributions concentrate on the propertization of copyright on the principle of exhaustion of the distribution right on the conflict between users privacy and personal data needs and on the balance between copyright and academic freedom starting from the difficulties inherently connected to the difficult task of balancing rights that respond to opposing interests each essay analyzes techniques and arguments applied by institutional decision makers in trying to solve this dilemma each author applies a specific methodology involving legal comparison while taking into account the european framework for copyright and related rights this work represents a unique piece of scholarship in which a single issue is read through different lenses demonstrating the need to reconcile copyright with other fundamental areas of law
