ken blanchard from servant leadership revisited with the traditional pyramid the boss is always responsible and the staff are supposed to be responsive to the boss when you turn the pyramid upside down those roles get reversed your people become responsible and the job of management is to be responsive to their people that creates a very different environment for implementation if you work for your people then what is the purpose of being a manager to help them accomplish their goals your job is to help them win shann ray ferch phd professor of leadership gonzaga university in an elegant and evocative rendering of the life of one of the world s great servant leaders edeh dr amah has given us a

glimpse of global servant leadership and a true vision of the kind of leaders we need to help heal the heart of the world. Dr. Peter Amah's book is a resource with global implications and with the honesty and tenderness that move us forward as human beings and that restore us to the deepest and most vital expressions of our collective humanity in envisioning for us the life and impact of Emmanuel Edeh, Nigerian and global servant leader. Dr. Amah gives hope to the people of every continent and in fact helps us reach as global citizens for one another in hope and love and good service. This hope is established first in the person, then the collective, and finally the world. Peter Amah has given us a guide to that hope and placed in our hands the gift that leads us from the despair of the past to a future graced by discernment and love.

The impact of the global financial crisis is still being felt today, and the deeply unethical behaviour of the top level leaders at those economic and financial organizations that were at the heart of the crisis has served to highlight the importance of integrity and in particular the need for servant leadership. If we are to avoid another major catastrophe in the management of both commercial and non-profit organizations, servant leadership has many features in common with transformational leadership but is primarily focused on caring about employees and their personal development. Ethical behaviour is one of the most important components of successful leadership, yet this remains insufficiently investigated, especially from an interdisciplinary perspective. With the help of theory, empirical analysis, and the relevant methodological apparatus, the authors fill the gap in the analysis of integrity and its impact on leadership and locate the significant factors which affect integrity in general. They develop and assess the forces that impact servant leadership style, as well as the ability to engender trust. As a starting point, they make two assumptions: an important element in leading is the ethical dimension of leadership; the ratio of factors that affect leading and the servant leadership style is complex, but the integrity of leaders is the most important among them. The authors examine four integrated scientific areas: ethics and business ethics, human resource management, and psychology, and focus on the analysis of the process of leadership and the factors within that process of leading that influence its success and its ethical dimension.
